

Piana

TIPOLOGIE DI APERTURA

- SCORR. INTERNO MURO
- BATTENTE

TYPES OF OPENING SYSTEMS

- POCKET DOOR
- SWING

La collezione Piana è caratterizzata da un'anta con telaio in alluminio racchiuso tra due vetri, l'effetto che si ottiene da questo tipo di assemblaggio conferisce alla porta un volume scatolare dalla perfetta planarità, rendendola adatta agli ambienti più ricercati.

The Piana collection is characterised by a door with an aluminium frame enclosed between two pieces of glass. The effect obtained with this type of assembly gives the door a perfectly flat box-like appearance, making it suitable for the most sought-after environments.

La colección Piana está caracterizada por una hoja con el bastidor de aluminio contenida entre dos cristales; el efecto que se obtiene con este tipo de ensamblaje proporciona a la puerta un volumen con forma de caja y con una perfecta planitud, haciéndola adecuada para los ambientes más refinados.

La collection Piana est caractérisée par une porte avec un châssis en aluminium enfermé entre deux verres ; l'effet de ce type de montage donne à la porte du volume et une planéité parfaite en la rendant adaptée aux milieux les plus recherchés.

Die Kollektion Piana ist durch einen Türflügel charakterisiert, bei dem der Aluminiumrahmen zwischen den beiden Scheiben eingesetzt ist. Die Wirkung, die dieser Montagetyp erzielt, verleiht der Tür ein kantiges und perfekt ebenes Aussehen und macht diese Tür zur idealen Lösung für ein raffiniertes Ambiente.

CARATTERISTICHE TECNICHE
TECHNICAL FEATURES

Le caratteristiche variano leggermente in funzione del controtelaio installato, che determina la scelta tra senza stipite, stipite minimal o stipite per coprifili. In tutti i casi è di serie l'apertura totale e la maniglia tiraporta.

Les caractéristiques varient légèrement en fonction du contre-cadre installé, ce qui détermine le choix entre finition sans chambranle, chambranle minimal ou chambranle pour goulottes électriques. Dans tous les cas, l'ouverture totale et la poignée pour tirer et fermer la porte sont fournies en série.

The characteristics vary slightly, depending on the counter frame, which determines the elimination of the jamb, or the use of a minimal jamb or a cable cover jamb. In all cases, the full opening and a door handle are supplied as a standard.

Las características varían un poco dependiendo del contramarco instalado que determina la elección entre sin jamba, jamba minimalista o jamba para cubrecables. En todos los casos es de serie la apertura total y la manilla tirador.

Die Eigenschaften unterscheiden sich leicht je nach installiertem Gegenrahmen, der festlegt, ob die Tür ohne Zarge, mit minimaler Zarge oder mit Zargenabdeckungen installiert wird. Serienmäßig sind immer die maximale Öffnungsweite und der Griff zum Ziehen der Tür.
